Acaena inermis purpurea	Coming in 2009 season.						
Ackama rosaefolia Makamaka	Naturally occurring from Kaitaia to Whangarei on stream banks and forest margins. Small bushy tree to 4m. Protect from wind and frost. Beautiful red under leaf, mass of cream flowers in spring.						20
Agathis Australis Kauri	A forest giant naturally occurring north of Auckland and Thames. Now being planted for Native Timber Forestry.			500 1,000	50		
Alectryon excelsus Titoki	Tree 7-10m forming distinctive black seed partially covered with bright red flesh, usually in spring attracting birds. Occurs naturally around streams and lowlands. Excellent specimen/shade tree.	400		150	200 100		20 20
Aristotelia fruticosa Mountain Wineberry Mountain Current	Being produced from cuttings for the 2009 season.						

Aristolelia serrata Makomako Wineberry, NZ Current	Fast growing tree 5-8m with flashes of red on stems and under leaf, fruit in summer for birds. Useful coloniser for re-vege work. Can be used for erosion control.						
Arthropodium cirratum Rengarenga Rock Lily	Popular garden lily growing to about 30-40cm which prefers dry, frost free sites. White flowers on stems 50-60cm high in summer. Naturally occurring on coastal banks and cliffs in the shade and in the sun.			150	300		
Astelia chathamica Chatham Island Astelia	Large silvery leaves, attractive garden specimen growing to 1m. Need free drain soil. Great in a rock garden or a large pot. OK at the coast. Seed grown, so there is slight variations in colour and leaf size.	300		100	100		140
Beilschmiedia tarairi Tarairi	Excellent specimen tree for shade/ shelter. Large dark green leaves. Large olive like berries bring wood pigeon. (seed sourced from waipu area)					30	300
Brachyglottis greyii	Naturally confined to a small area of the wellington coastline. It has hairy grey oval leaves and bright yellow daisy flowers in summer, growing to about 1m. Best plant where it can get a bit of wind. Great in coastal landscaping.						20
Carex buchananii	Reddish-brown; tussock like with distinct erect habit; ideal for garden rockery. Curled leaf ends. Grows to 600mm			200			
Carex comans	Small, compact tussock-like sedge dense with soft green leaves. Great in mass. Grows to 300mm.			600	600		
Carex comans 'bronze'	Small, compact tussock-like sedge dense with soft brown leaves. Great in mass. Grows to 300mm.				300		
Carex secta Purei, Pukio Tree Grass	Large vigorous, green sedge forms lifted tufts in swamps to 1m. Great in wet places. Very popular for wetland plantings and in landscaping around the garden.			1,800	600		
Carex tenuiculmis	A nice rich red/brown grass with arching foliage to 500mm. Excellent in mass or as individuals in the garden. Will tolerate quite wet and dry conditions. Prefers full sun.			2,000	200		
Carex testacea	Attractive garden plant used extensively in landscaping. Foliage is green at base colouring to orange/red on top, growing to 400mm. OK at the coast as it grows naturally in sand dunes.			400	800		
Carex virgata	Vigorous, green swamp sedge to 900mm. Similar to Carex secta but will grow in drier sites.			100			

Carmichaelia aligera Nth Is. Native Broom	Flattened branches; small white and purple flowers; favours stream sides, forest margins and coastal hills. Slow growing to 5m. (seed sourced from Matapouri Bay)	400		20	20	
Carpodetus serratus Putaputaweta Marble Leaf	Marbled-leaved small tree to 4m, white flowers in spring with bird attracting fruit. (seed sourced from waipu area)				60	
Cassinia leptophylla Tauhinu Cottonwood	A coastal shrub to small tree growing from 1m to 3m depending on conditions. It has small green to grey leaves with fine white hair beneath. Clusters of small cream flowers in summer. Grows naturally in sandunes. (cutting wood sourced from waipu area)				50	
Chionochloa rubra	This tussock naturally occurs from central plateau southward. Its attractive red-bronze arching foliage grows to about 1m makes an excellent landscape plant. In Northland it is best planted where it can get some wind to reduce risk of fungle problems. Slow growing but lives long & looks good.			20		
Coprosma acerosa Tatarakeke Sand Coprosma	Small needle-like golden-green leafed coprosma growing a tangle of prostrate branches to 300mm. Prunes well. Looks great hanging over retaining walls and rocks. Naturally occurring in sand-dunes. (cutting wood sourced from waipu area)	600			150	
Coprosma acerosa 'Red Rock'	Small needle-like dark green leaves with red-brown stems growing a tangle of prostrate branches to 300mm. Prunes well. Looks great hanging over retaining walls and rocks. OK for coastal landscaping.		80		40	
Coprosma arborea Mamangi	Small tree growing 4-6m in sun or shade. Pear shaped leaves. Berries in autumn for birds to eat. Go for re-veg or landscaping. (seed sourced from Tangihua Ranges area)					
Coprosma areolata Thin-leaved coprosma	<i>Coprosma areolata</i> grows as a shrub or small tree to 5m, usually erect in habit. The pale green leaves are small and thin, hence the common name 'Thin-leaved coprosma'. It produces blue or black berries which the birds can eat. Cutting wood sourced from Waipu area.				30	
Coprosma atropurpurea	A low growing ground cover similar to <i>Coprosma hawera</i> . Small green to purple leaves on divaricating prostrate branches make a mat that covers the ground. Great in rock gardens or flowing over retaining walls.				100	
Coprosma 'Beatson's Gold'	A small coprosma shrub growing to about 1m with small green and golden yellow variegated leaves. Branches tend to be spreading to semi-erect. Great dotted in the garden.				40	
Coprosma 'Copper Shine'	Small glossy leaves of copper to green. Spreading branches growing 1 to 2 metres high. Great for landscaping around the house.				5	
Coprosma 'Cuttie'	Small glossy leaves of dark red, purple, brown, green. Erect branches growing 1 to 2 metres high. Great for landscaping around the house.				5	

Coprosma 'Evening Glow'	Small glossy oval leaves of yellow, red, orange, green (like a sunset). spreading branches growing 1 to 2 metres high. Great for landscaping around the house.				60	40	
Coprosma 'Fire Burst'	Small glossy oval leaves of Bright pink, white, green. spreading branches growing 1 to 2 metres high. Great for landscaping around the house.						
Coprosma 'Hawera'	Small needle-like green leafed coprosma cultivar growing low prostrate branches to 200mm. Prunes well. Looks great hanging over retaining walls and rocks.	600			200		
Coprosma 'Karo Red'	Small glossy oval leaves of dark red and green. spreading branches growing 1 to 2 metres high. Great for landscaping around the house.	150			100		
Coprosma kirkii	Small green leafed coprosma cultivar growing lower prostrate branches to 600mm. Prunes well. Great to cover banks with.				200		
Coprosma kirkii variegated	Small green and white variegated leaf coprosma cultivar growing lower prostrate branches to 600mm. Prunes well. Great to cover banks with.				10		
Coprosma 'Liz Meek'	A small coprosma with small red leaves. Grows to about 1 metre. Responds well to clipping. Great for in the landscaping. Similar to <i>Coprosma</i> 'Rob Roy' but with larger leaves and <i>Coprosma</i> 'Karo Red' but with smaller leaves.						
Coprosma 'Middlemore'	Small glossy round leaves of green. Erect and spreading branches growing 3 to 4 metres high. Great for landscaping around the house or as a hedge.	120			150		
Coprosma 'Painter Pallett'	Brilliant colours of yellow, orange, red and green on this shrub which grows to about 3m. Best looking if kept pruned well to about 2m. Will handle coastal winds.				50		
Coprosma prostrata	Small green leafed coprosma cultivar growing lower prostrate branches to 400mm. Prunes well	60			100		
Coprosma propinqua Mingimingi Swamp Coprosma	Small-leaved shrub growing to 2m, common in wet areas. Excellent for landscaping and revegetation of wetlands.			100	100		
Coprosma 'Rainbow Surprise'	Small glossy oval leaves of pink, white, yellow, green. spreading branches growing 1 to 2 metres high. Great for landscaping around the house.						

Coprosma repens Taupata Mirror Plant	Hardy coastal shrub to 3m, excellent wind and seaspray shelter. Glossy green leaves with red fruit which attract birds in summer.			50	1,000		500	
Coprosma repens 'Prostrate' Prostrate Taupata	Hardy coastal shrub growing flat over rocks to about 50cm. Excellent at the coast or landscaping over rocks. Glossy green leaves with red fruit which attract birds in summer.						30	
Coprosma rhamnoides Twiggy Coprosma	Divaricating shrub with small leaves growing to 1.5m. Good for box hedging. (seed sourced from waipu area)					50		
Coprosma 'Rob Roy'	A small coprosma with small red leaves on rather twiggy stems. Grows to about 1 metre. Responds well to clipping. Great for in the landscaping. Similar to <i>Coprosma</i> 'Liz Meek'.							
Coprosma robusta Karamu	Widespread, very hardy shrub growing 3-4m. Tolerates wet, dry, cold and wind. Red berries bird attracting. Excellent for revegetation. (seed sourced from waipu area)			300	200			
Coprosma rotundifolia Round-leaved coprosma	A tangled divaricated shrub growing from 3-5m in damp forests throughout NZ. Small red berries ripen in autumn which wax eyes feed on. Ok for adding variety to revege plantings or existing areas of restored wetlands.						100	
Coprosma taiko	Small green leafed coprosma cultivar growing lower prostrate branches to 300mm. Prunes well		500			50		
Coprosma virescens (female plant)	Coming in 2009 season.							
Cordyline australis Ti kouka, Whanake Cabbage Tree	Durable tree, grows in swampy areas, open sites, coastal. Effective planted in groups or in a tub. Excellent wetlands revegetation and erosion control. (seed sourced from waipu area)	600		500	1,500	600		100
Cordyline 'Falcon'	A cabbage tree with broad soft red leaves which grows to about 3m. Great in landscaping around the house or in a tub on the deck.						50	
Coriaria arborea Tutu Toot	Variable from low shrub to small tree; excellent stabiliser to steep slopes. Poisonous to stock. Excellent revegetation plant, very fast growth. (seed sourced from waipu area)			20				
Corokia buddleioides Korokio, Korokio Taranga	Naturally occurring in the northern parts of the North Island. It grows to about 2.5 metres high. Its leaves are similar in appearance to that of an olive tree and its branches tend to be erect. It grows best in a sunny site but will tolerate semi-shade. It requires well-drained soil with some moisture. Great for a visual barrier or dotted in the garden .							
Corokia cotoneaster Korokio Wire-netting bush	The tight tangle of stems gives rise to the common name of wire-netting bush. It grows in a dense bush from 1m - 3m high. The small leaves are green and bronze. It is found naturally in dry stoney areas throughout NZ and tolerates salt winds and exposed wind areas. Great landscaping plant.	120				30	70	

Dianella 'Margaret Pringle'	A variegated form of <i>Dianella nigra</i> . 40cm high, flax-like plant with bright blue berries in summer. Effective planted in groups. Grows in shade or full sun, on dry banks or moist stream edges.							
Dodonaea viscosa Akeake	Small hardy tree to 7 metres with green oval leaves. Tolerates to coastal wind and dry conditions. Great for coastal revegetation. Open roots well when planting and stake. Best planted when the plant young and not rootbound.	500		200	150			
Dodonaea viscosa 'purpurea' Purple Akeake	Small hardy tree to 7 metres with purple oval leaves. Tolerates to coastal wind and dry conditions. Great for coastal revegetation. Open roots well when planting and stake. Best planted when the plant young and not rootbound.	60		400	100			
Entelea arborescens Whau Corkwood, NZ Mulberry	Large leaves, white flowers in spring and seed capsules much like a chestnut. Frost tender. Great at the coast. Fast growth. Good for revegetation in Kikuyu grass. Very lightweight wood.			30		80		
Fuchsia excorticata Kotukutuku, Kohutuhutu, Konini Tree Fuchsia	The largest fuchsia in the world growing throughout NZ and the Auckland Islands up to 12m high in the wild but usually grows to about 4 in the garden. Tui and wood pigeon feed on the berries. Now Germinating.		200					
Gaultheria antipoda Snowberry	Usually found in subalpine areas, it also lives in rock places throughout NZ. A small number of plants exist near Waipu. Being produced from cuttings for the 2009 season.							
Griselinia littoralis Papaumu, Kapuka Broadleaf	Very hardy tree; glossy green leaves growing to 10m in the forest but about 6m in the garden. Often pruned into low hedges or specimen trees. Excellent shade tree. Ok at the coast. Does not like wet ground.			20	600	800		150 50
Griselinia lucida Akapuka Puka	Large, glossy-leaves on tree that can grow to 10m or more in the forest but is often pruned into a hedge or specimen tree for landscaping. It will grow in windy and coastal areas. Does not like wet ground. New growth tips will burn in heavy frosts.				100	50	90	
Hebe 'Champagne'	A low spreading shrub up to 1m high. Small dark green leaves often flushed with purple on young plants. White flowers with a touch of violet in late summer and early autumn. It is likely to be hybrid of <i>Hebe bishopiana</i> and another small leaved Hebe.							
Hebe diosmifolia	A small round bushy shrub growing to about 1m, however if left alone in ideal condition it can reach 2m or more. It has small green leaves with serrations. Great scattered in your landscaping or in mass. Mass of flowers in summer. (similar appearance to <i>Hebe Wairua Beauty</i>)				30	30		
Hebe glaucophylla	A small round bushy shrub growing to about 1m. It has blue grey leaves. Great scattered in your landscaping or in mass.				20			
Hebe hulkania	A small open branched shrub growing to about 1m. It has glossy green leaves with serrations and dark red colouring around the edges. Great scattered in your landscaping or in mass. Violet flowers in summer. Best planted in a shelter area to stop wind damage to branches.				10			

Hebe 'Icing Sugar'	An attractive Hebe cultivar with green leaves about 5cm long and 1cm wide. It's rose-pink flowers which fade to white as they age are on racemes 7-11cm long. Flowers from spring to autumn. Its origins are unknown but appeared in the 1980's.				20	
Hebe 'Lavender Lace'	A shrub that grows to about 2m high and 2.5m wide. It has long narrow leaves (very similar to Hebe Wiri Mist but with more open foliage). In the right conditions it will usually have mauve flowers all year round.					
Hebe obtusata						
Hebe 'Oratia Beauty'	A good flowering, small, draught tolerant shrub growing to about 75cm. It has small green oval leaves. Great scattered in your landscaping or in mass. Mass of flowers in summer.				20	30
Hebe parviflora	This Hebe can grow to several metres tall if left alone but can be clipped to keep it as a shrub. Its name means small flowers, which are pink to mauve and then fading to white after pollination. Naturally occurring on forest margins, stream edges, coastal hill and sub alpine from Whangarei south.				40	20
Hebe 'Red Edge'	An attractive small shrub growing to about 1m with blue grey (glaucous) leaves with red edges. Mature plants have violet flowers in summer. Great scattered in your landscaping or in mass.				10	
Hebe speciosa Napuka Titirangi	this hebe is hard to confuse with others with its broad, fleshy, blunt leaves and distinctive purple flowers. Rather than having lots of flowers covering it, it tends to have few flowers over many months of the year. Naturally occurring on sea cliffs of the North Island.					
Hebe stricta Koromiko	Hardy, fast grower. Willow-like leaves. Grows well in variety of soils wet or dry. Excellent for revegetation in open areas. Pale mauve flowers. (cutting wood sourced from Waipua area)					50
Hebe topiaria	A small glaucous leaved hebe growing to about 1m round and high shape with a flattened top. Its white flowers usually do not appear until it is older and then only sparsely. A very popular specimen for the garden planted either individually or in mass.	60			100	
Hebe townsonii	A shrub with erect habit growing from 1m and sometimes up to 2m high. Green foliage and light mauve to white flowers in spring to early summer. It is easily recognised by the unique (only this Hebe has it) lines of dots (domatia) on the underside of the leaves.				50	
Hebe 'Wairua Beauty'	A small round bushy shrub growing to about 1m. It has small green leaves with serrations. Great scattered in your landscaping or in mass. Mass of flowers in summer. Similar appearance to <i>Hebe diosmifolia</i> , but a little more open branched.				50	
Hebe 'Wiri Charm'	A shrub growing to 75cm high and 1.3m wide. Branchlets are reddish. Flowers are a deep shade of rose-purple. Flowering is quite prolific over a long period of summer and sometimes in winter. Quite disease resistant. It is a hybrid of <i>H. diosmifolia</i> and <i>H. 'Wiri Jewel'</i> (hybrid of <i>H. speciosa</i>).					

Hebe 'Wiri Mist'	A shrub that grows to about 2m high and 2.5m wide. It has long narrow leaves (very similar to Hebe Lavender Lace but more compact). It is a hybrid of <i>H.diosmifolia</i> and <i>H.albicans</i> . When flowering the flowers can almost hide all the foliage.						
Hedycarya arborea Porokaiwhiri Pigeonwood	erect growing tree 4 to 8 metres. Dark green leaves. Bright orange berrys the size of small olives attract pigeon in summer. (sourced from waipu area)					5	2
Hibiscus diversifolius (Northland)	1 of only 2 species native to NZ. It is extremely rear in the wild, growing in frost free, sunny spots in coastal areas. Grows as a shrub 1m to 2m high. It has bristles on branches and leaf stems. Large lemon-yellow flowers up to 7cm wide with deep maroon centres.						
Hoheria populnea Houhere Lacebark	Naturally occuring in the northern half of the Nth Island. Graceful erect tree to about 5m, pointed, oval, serrated leaves, white flowers summer. Excellent revegetation and erosion control. Attracts birds and insects. (seed sourced from waipu area)			150	50	10	
Hoheria sexstylosa Houhere Lacebark	Found from Whangarei to Nelson, this species is similar to <i>H.poplnea</i> but has longer more serated leaves. It grows to about 5m with branches that tend to weep and it has a profussion of white scented flowers in summer and autumn.			100	100	30	
Knightia excelsa Rewarewa NZ Honeysuckle	Often dominant in second stage regenerating bush. Long, usually serrated leaves. The wood was used for furniture. Flowers attract birds and bees. Erect growth to 20m. Settlers called it 'Busket of water tree' refering to it being useless for firewood.					200	60
Kunzea ericoides Kanuka Tea Tree	Hardy, attractive form with fine foliage and small white flowers attracting bees. Useful revegetation and shelter. Larger and longer living than Manuka. OK at the coast. (seed sourced from waipu area)			1,500	1,500		
Laurelia novae-zealandiae Pukatea	A very attractive tree growing throughout most of NZ in swampy forests to more than 10m high. In the garden it usually reaches 6m - 10m high. It has large buttress roots spreading from the trunk. Ideally plant near streams and lakes.						10
Leptospermum scoparium Manuka, Kahikatoa Tea Tree	Hardy coloniser; tolerant of wet or dry areas in variety of soils. Good firewood. White flowers. Good for revegetation. Ok at the coast. (seed sourced from waipu area)			400	3,000		
Leptospermum scoparium 'Crimson Glory'	A Tea-tree which grows to about 2m with crimson coloured flowers. Great in the native landscaping to add some colour.						
Leptospermum scoparium 'Sunraisia'	red flowering tea-tree which grows to about 2m. Great in the native landscaping to add some colour.						
Libertia ixioides	Erect yellow and green flax like leaves grow to about 30cm. Naturally occuring throughout NZ from sea level to 600m. Small flowers on erect stems usually no higher than the leaves. This is a great landscaping plant, particularly in rock gardens.				20	30	

Lophomyrtus bullata Ramarama	Small shrub or tree growing to 6m in a forest setting but usually about 3-4m in landscaping. Distinct red and green crinkly leaves. Naturally occurring throughout the Nth Is and the upper parts of the Sth Is. Good garden shrub. Ok at the coast or in the shade of larger trees.								100	
Lophomyrtus 'Red Dragon'	Small shrub growing to about 2m. Distinct pink-red crinkled foliage which gets darker as it matures to a blackish-red. Good garden shrub. Ok at the coast.								60	
Machaerina sicclairii Pepepe, Toetoe tuhara	A grass with iris-like leaves growing to about 1 metre. Naturally occurring throughout NZ in wetlands and stream edges. Beautiful red brown flower heads in summer make this an ideal landscaping plant which will grow in wet and dry areas. Great for wetland revege.		60							
Macropiper excelsum Kawakawa Pepper Tree	Kawakawa is common in shady forests throughout the Nth Is and in the Sth Is as far south as Banks Peninsula. It has heart-shaped leaves with medicinal properties. Frost tender. Growing to about 3m.						100		100	
Melicope ternata Wharangi	A small tree growing on coastal forest margins. Bright yellow-green leaves with black seeds in little capsules. Bird attracting. Grows into a round shape if out in the open, but will grow erect if planted closely with other plants. OK for revege but takes a little while to get established.	300	300			100	300	250		10
Melicytus crassifolius	A shrub with small oval leathery leaves on stout branches growing prostrate in harsh windy environments or forming a shrub to about 1 metre. Naturally occurring at the coast or rocky outcrops inland. Great for coastal landscaping. Now being produced by cuttings for 2009.									
Melicytus micranthus Manakura	A divaricating shrub growing 1-2m high in lowland forest throughout NZ. It has very small, green, oval, leathery leaves. Prefers a dry site. Fruit in summer. Sourced from Brynderwyns.									
Melicytus ramiflorus Mahoe, Hinahina Whiteywood	Common tree in clearings and forest margins, often on the roadside. It is hardy but young foliage is frost tender. Bright green leaves. Fast growing, great for revegetation, needs moist ground to get established. Berries attract birds. (seed sourced from waipu area)						2,000	20	700	
Meryta sinclairii Puka Pukanui	Naturally from the Hen & Chick and the Three Kings Islands. Puka have very large leaves up to 20cm wide & 50cm long. It grows with wide spreading branches to about 5m high. It needs sunny sites with reasonable soil. It is frost tender.									
Metrosideros carminea Akakura, Puatawhiwhi Climbing Red Rata	Small round dark green leaves with mass of small crimson flowers in spring. It will climb if placed against rocks, tree trunks etc. Will grow as a round bush 1 to 1.5 metres high if place by itself. Grows best with some moisture and semishade. Naturally occurring from northland to eastcape.								50	
Metrosideros diffusa 'Crystal'	A small leaved climber with cream and green varigated leaves. A stuning little plant. Plant where roots stay cool when young. Cultivar of <i>Metrosideros diiffusa</i> which grows in forest from to Marlborough.									
Metrosideros excelsa Pohutukawa NZ Christmas Tree	Well known for its masses of crimson flowers at Christmas. Grows best by the sea. (seed sourced from Langs Beach)	300	1,000			1,000	1,000	300	500	50

Metrosideros perferata Akatea Climbing White Rata	small round dark green leaves with small white flowers like the pohutukawa. It will climb if placed against rocks, tree trunks etc. Will grow as a round bush 1 to 1.5 metres high if place by itself. (cutting wood sourced from waipu area)				20	50	
Muehlenbeckia astonii Shrubby Pohuehue	A coastal shrub growing naturally from Wellington area to Banks Peninsula. It grows from about 1m to 2m high. Its tangle of wiry stems make a distinctive landscaping plant.				60		
Muehlenbeckia axillaris	Naturally occurring in rocky areas and riverbeds of the Sth Is and lower Nth Is. A good ground cover for harsh sites, forming a tight low-lying mat with small dark green leaves.					100	
Myoporum laetum Ngaio, Kaio	Coastal tree fleshy gland dotted leaves; very wind hardy. Grows in sandy soils. Fast growing. Great for coastal revegetation. Grows to about 6m.				150		
Myrsine australis Mapau, Mapou, Matipo Red Matipo, Red Maple	Small, compact tree; forest margins and scrubland. Nice foliage plant with red stems growing to 4m. Birds attracted by small black fruit. (seed sourced from waipu area)				100	250	
Myrsine salicina Toro	Toro forms an attractive open branched tree growing to about 8m. It has long narrow leaves which can get up to 18cm long. It has berries for birds to eat. Naturally occurring from North Cape to Greymouth.				40	40	15
Neomyrtus pedunculata Rohutu	A very slow growing tangled shrub growing to about 2m. Naturally occurring throughout NZ in scrublands but rare in Northland. It's young stems are square which is rather unique and it has small round-oval red leaves. Tiny white flowers in summer, followed by orange berries.						
Olearia albida Tanguru Coastal Bush Tree Daisy	a small tree growing to about 4m in your garden. It has pointed oblong leaves with very fine hairs on them, and bunches of small white flowers in spring. Occurs naturally throughout the north island on part of the south island in coastal forests.						
Olearia cheesemanii Streamside Tree Daisy	A small tree growing to about 4m in your garden. It has long pointed leaves and masses of bunches with small white flowers in spring. Occurs naturally from Coromandel south to Westport along stream edges near forests margins.					50	5
Olearia furfuracea Akepiro Tanguru	A small tree growing to about 4m in your garden. It has oval leathery leaves and bunches of small white flowers in spring. Occurs naturally from North Cape to Ruahine Ranges up 600m altitude in scrubland and forest margins and at the coast. (stock originating from Pataua North)				10		
Olearia lineata Needle-leaved tree-daisy	A tree daisy growing 2-4m with rather needle-like leaves and drooping branches that give an attractive weeping appearance. Naturally occurring from Lake Brunner in the Sth Is to Stewart Is.					50	
Olearia macrodonta	Attractive holly like foliage. Daisy like white flowers in summer. Prefers cool well drained soils. Grows to about 3m high and 1.5m wide. Its foliage creates a good contrast in the garden.					50	

Phormium tenax Harakeke Flax	Distinctive NZ plant; tolerant of wet, dry, warm, cold, high and low fertility soil; excellent shelter. Flowers attract native birds. Great for revegetation. Ok at the coast. Foliage grows to 2m with flower heads to 3-4m. (seed sourced from waipu area)			2,000	6,000	800		50
Phormium tenax 'purpurea' Purple Flax	Purple flax with flowers which attract native birds. Great for landscaping. Ok at the coast. Foliage grows to 1.5m with flower heads to 2.5m.			600				
Phormium 'Thumbellina'	A small dark red-purple ornamental flax with narrow leaves growing to about 60cm. Great in the garden.					20	100	
Phormium 'Tom Thumb'	A small ornamental flax growing to about 60cm with dark green leaves with chocolate brown edges and tips. Great in the garden.					20	100	
Phyllocladus trichomanoides Tanekaha Celery Pine	a small tree growing to about 8-10m with leaves, smaller but similar in shape to a celery leaf, hence the common name 'Celery Pine'. Its leaves are green to brown in colour and are in fact flattened branches (not leaves). Common throughout much of NZ to 800m altitude.					10	100	
Pimelea prostrata NZ Daphne	Naturally occurring throughout NZ to 1600m. An excellent spreading ground cover with small bluish leaves and tiny white flowers in spring and autumn. It prefers well drained soil and can tolerate dry conditions quite well, so it is very good for rock gardens.						60	
Pittosporum cornifolium	Coming in 2009 season.							
Pittosporum crassifolium Karo	Mainly coastal small tree to 6m or so, in north Island, excellent shelter. Salt and wind tolerant. Great for coastal revegetation. (seed sourced from waipu area)	2,000	600	200	2,000	1,000	500	
Pittosporum eugenoides Tarata Lemonwood, White Maple	Crushed leaves emit lemon scent hence the name "Lemonwood". Grows on forest margins, clearings stream-sides. Good hedge plant, or specimen, scented flowers. 6-8m high.			50	100	300		50
Pittosporum kirkii Kirk's Matipo	Coming in 2009 season.							
Pittosporum ralphii Karo	Larger, softer leaves than the more common Karo (P.crassifolium). Mainly coastal small tree to 6m or so of North Island, excellent shelter. Salt and wind tolerant. Great for coastal revegetation and hedges.							10
Pittosporum tenuifolium Kohuhu, Black Matipo Black Maple	Small tree 6-8m high, very hardy and widespread, useful for revegetation, hedging and specimen. Leaf shape and size often varies from plant to plant. (seed sourced from waipu area)			100	300	250		10
Pittosporum 'Irene Paterson'	Leaves are almost white with specks of lime-green which darken as the leaves age and the same size as the original <i>Pittosporum tenuifolium</i> of which it is a hybrid of. Very slow growing to about 2-3 metres high. Makes a nice contrast in colour around the garden.							

Pittosporum 'Limelight'	Leaves are two-toned in dark and light lime-green and the same size as the original <i>Pittosporum tenuifolium</i> of which it is a hybrid of. Will grow to about 4-5 metres high. Makes a nice hedge or grown individually around the garden.										
Pittosporum 'Tandarra Gold'	Leaves have green and gold varigations and tend to be smaller than the original <i>Pittosporum tenuifolium</i> of which it is a hybrid of. Will grow to about 3-4 metres high. Makes a nice hedge or grown individually around the garden.										
Pittosporum tenuifolium 'Varigatum' Varigated Kohuhu	Cultivar of P.tenuifolium. Varigated grey - green leaf. Small tree 6-8m high that is great for hedging or as a single specimen in your garden.							50	50	10	
Plagianthus divaricatus Makaka Saltmarsh Ribbonwood	A dense twiggy shrub growing to about 2m. It has narrow leaves about 2cm long and small scented flowers in spring. Naturally occuring throughout NZ in saltmarshes so it is a valued plant for coastal planting in landscaping as well as revege of wet salty areas. Seed sourced south of Whangarei.		400			400		40	60		
Plagianthus regius Manatu Ribbonwood	Largest of NZ deciduous trees. Usually found near water. Quick growing and hardy. Great for revegetation around waterways. (seed sourced from waipu area)	800			300	400		50	100	20	
Podocarpus totara Totara	Slow growing tree to 15 - 25 m. Red fruit in jan - feb brings birds. Ideal for large hedge, single speciman, revegetation of a forest or forestry for timber. (seed sourced from waipu area) Now being planted for Native Timber Forestry.	2,000	2,000		1,800	200		700		10	20
Prumnopitys ferriginea Miro, Toromiro	One of the forest giants throughout NZ, slow growing to about 25m but usually only about 10m as a speciman tree. Wood pigeon feed on the distinct tupentine scented red berries. Separate male and female trees.										30
Prumnopitys taxifolia Matai Black Pine	similar to Miro in size and distribution. Its fruit is black. The juvenil tree has rather drooping tangled brown twiggy stems that range in coulour from orange to brown and silver and can often look dead to those who aren't fimilar with it.							40			
Pseudopanax arborea Puahou Five finger	A common tree growing in lowland forests throughout NZ. It has hand shaped leaves with 5-7 leaflets and the tree grows 3-6m with many branches to form a nice rounded look. Great in the landscaping and also used for revegetation. Fruit in winter attract birds.										100
Pseudopanax crassifolium Horoeka Lancewood	Unique lance-like foliage changes as tree matures to rounded top. Hardy, effective in groups. Fruit ripen in winter and attract tui and other birds.								200		
Pseudopanax laetus	Grows as a small tree to about 4-5m with a round form with large compound leaves with 5-7 leaflets with are a glossy dark green. Naturally occuring from Corromandel to Taranaki in forests and forest margins. Looks great in a subtropical garden with its large leaves.									30	50
Pseudopanax lessonii Houpara Five Finger	A small tree growing to about 3-4m in your garden. Naturally occuring in coastal forests of the top half of the Nth Is. It has hand shaped leaves with usually 5 leaflets but can have 3 to 7. Berries in winter for birds to eat. Very similar to <i>Pseudopanax arborea</i> . Great for revegetation.							100	100		

Pseudowintera colorata Horopito Pepper Tree, Maori Painkiller	Forest and scrubland; pepper tasting leaves spots of red on pale green leaves, grows about 3-4m - unpalatable to stock. Hardy, slow growing. Usually around the lower snow line in the mountains.				50	100			10		
Rhabdothamnus solandri Waiu-atua NZ Gloxinia	Small shrub growing in lowland forest of the Nth Is. It has broad oval leaves with serrations around the edge and has bell shaped flowers about 25mm long which range in colour from yellow, orange and red. It is an attractive shrub but can be prefers shade and needs a frost free shady area. Sourced from Waipu.										
Rhopalostylis sapida Nikau NZ Palm Tree	Nikau means "numerous leaves coming from one stalk". One of NZ's iconic trees pictured and used in many forms of art. Naturally occurring from nth cape to westport in forest, stream edges, and at the coast. Slow growing.				60						
Rubus australis	Coming in 2009 season.										
Scheffler digitata Pata, Pate, Patete Seven Finger	Grows in sheltered areas in valleys and the bush. Large hand shaped leaves with 5 to 9 fingers. Fast growing. Needs plenty of water to stay looking good. Great for revege of stream sides and wet areas.					40					
Solanum laciniatum Poroporo	A fast growing shrub with dark green lobed leaves and purple flowers about 25mm across which appear throughout most of the year. Good for revege and landscaping. Keep pruned for best effects. Prefers well drained poor soil. Seed sourced in Northland.			100	40			20			
Sophora longicarinata Kowhai Long leafed Kowhai	Formerly a sub species of Sophora microphylla. It has long leaves with very small leaflets. Flowers are large and pale yellow. Naturally occurring in Takaka near Nelson.										
Sophora microphylla Kowhai Small leafed Kowhai	Large yellow flowers. Deciduous. Grows to about 8m. S.microphylla is more common in the north than S. tetraptera. (seed sourced from BOI area)			100	400	50	750		10	40	
Sophora prostrata (Hamner Springs)	Coming in 2009 season.										
Sophora tetraptera Kowhai	Widespread in cultivation. Large yellow flowers. Deciduous. Grows to about 8m. (seed sourced from Lake Taupo)			40	360						
Vitex lucens Puriri	Massive, spreading tree with dark glossy green leaves, grows to 20m round and high in open areas. Lots of red flowers in spring then fruit in summer attract wood pigeon. Valuable red-brown timber. (seed sourced from waipu area) Now being planted for Native Timber Forestry.							200	200	40	20
