## INFO SHEET - Index of Plant Names

This is by no means a full list of all NZ plant names but is a list of many of the Native plants in cultivation listed.

Some Maori names have several different species listed such as Akeake.

Some of the names are from the days of the settlers and are no longer used but still exist in old books.

Maori names of some plants vary between North Island and South Island such as Mapau in the North Island and Matipo in the South Island.

Plants at the bottom of the list have no names that we have found other than the botanical one. We'll add to this list as we find time.
